

Nutrition Program

Ketan Bhoje

Ketan Overview

Details

1. Goals- Primarily Fat loss, Some Muscle building
2. Profession- Software Engineer
3. Weight- 85.5 kg
4. Wake up- 8:30 am
5. Sleep- 11:30 pm
6. Workout Time- 7:00 pm
7. Dietary Pattern- Non-vegetarian

Target Macros

1. Energy→ **1731 Kcal**
2. Protein→ **111.2g**
3. Carbohydrate→ 210.1g
4. Fat→ 49.6g

Menu Plan

Time	Menu	Description
Meal 1 (Breakfast)	Whey Protein Shake - <u>Whey Iso- Max, FUEL ONE, 1 scoop</u> Poha - Rice flakes, 60g measured raw - Potato, 50g measured raw - Tomato, 50g measured raw Fruit - Pineapple, 100g Supplements - <u>Vit. D3+K2, HealthyHey, 1 Tab</u> - <u>Multivitamins and Mineral, Well, 1 Tab</u>	Have 1 scoop of whey in 400ml of water. You can alternatively replace whey with Eggs (1 whole, 4 whites), Paneer (100g) or Tofu (100g) and have Scrambled Eggs, an Egg Omelette, Egg Bhurji, Grilled Paneer, Paneer Bhurji, Grilled Tofu, Tofu Bhurji, etc. You can alternatively add the Paneer or Tofu to the Poha. You can replace Poha with Lemon Rice (60g= 180g cooked), Rice Dosa (4 medium), Idli (4 small), Oatmeal (60g), etc. You can have Papaya, Kiwi, Guava, Orange, Berries, etc instead of Pineapple.

Time	Menu	Description
Meal 2 (Lunch)	Chicken Fried Rice - White rice, 60g measured raw - Chicken, breast, skinless, 75g measured raw - Tomato, 50g measured raw - Carrot, 50g measured raw - Capsicum, 50g measured raw Salad - Cucumber, 25g measured raw - Carrot, 25g measured raw Yoghurt - Yoghurt, 1/2 cup (80g)	60g of raw rice will increase to 180g of cooked rice which is approx 1 cup of cooked rice. Rice is low FODMAP and better for your gut. You can also have 3 medium rotis instead of 60g of rice, but rice is preferred. 75g of chicken contains approx 3 medium pieces of chicken. You can alternatively use recipes like Chicken Curry, Vegetable Chicken Stir Fry, Chicken Vegetable Stew, Kadai Chicken, Chicken Korma, etc with Rice. You can also consume Eggs (1 whole, 3 whites), Fish (75g), Paneer (75g) or Tofu (75g) instead of Chicken. You can alternatively have Stir-Fried or Sauteed Vegetables instead of Salad.
Meal 3 (1.5 hrs Pre-workout/ Snack)	Smoothie - <u>Whey Iso- Max, FUEL ONE, 1/2 scoop</u> - Banana, slightly ripe, 1 large (100g) - Dates, 1 piece (8g) - Almonds, 10 pieces (15g) - Walnuts, 4 halves (8g)	Mix all the ingredients in 300ml of water and prepare a Smoothie out of it. Ideally, add soaked nuts. You can add 1 large or 2 elaichi bananas. You can replace Dates with Dried Figs (1 piece). You can have these foods separately as well.
7:00 pm	Workout	300 - 500 ml water/hour

Time	Menu	Description
Meal 4 (Post- workout/ Dinner)	Egg Curry Rice - Eggs, 1 whole, 4 whites - White rice, 60g measured raw - Tomato, 100g measured raw - Capsicum, 50g measured raw - French beans, 50g measured raw Supplements - <u>Creatine, FUEL ONE, 3g</u>	60g of rice will increase to 180g of cooked rice which will be approx 1 cup of cooked rice. Rice is low FODMAP and better for your gut. You can also have 3 medium rotis instead of 60g of rice, but rice is preferred. You can alternatively use recipes like Egg Bhurji Rice, Palak Egg Rice, etc. Instead of having Egg Rice, you can have Lemon Rice, Tomato Rice, Vegetable Pulao, etc and have the Eggs as an Omelette, Scrambled Eggs, etc. You can replace Eggs with Whey (1 scoop), Chicken (100g), Fish (100g), Paneer (100g) or Tofu (100g). Mix creatine well before drinking it.

Cooking oil- Use up to 15 ml of Extra Virgin Olive Oil everyday.

Guidelines

1. Low FODMAP foods

- For vegetables, stick to cucumbers, carrots, lettuce, tomatoes, okra, spinach, and bell peppers. These minimise bloating and GI distress.
- You can find a list of gut friendly foods [here](#) and [here](#).

Vegetables

- Alfalfa
- Bamboo shoots
- Beansprouts
- Carrots
- Cucumbers
- Ginger
- Kale
- Lettuce - iceberg, red coral, butterhead, rocket
- Olives
- Parsnip
- Potato
- Pumpkin
- Radish
- Red peppers
- Rhubarb
- Seaweed, nori
- Spinach
- Tomato

Fruits

- Breadfruit
- Clementines
- Grapes
- Mandarins
- Oranges, navel
- Papaya
- Strawberries

2. Try to use only these following condiments:

Salt, Pepper, Turmeric, Lemon

3. Drink at least 3-4 Litres of water everyday.

4. Avoid smoking, drinking and any recreational drugs.

5. Schedule Modifications:

If your schedule varies, it's okay, but please maintain the same food quantities that are given in the above menu plan. For the pre-workout meal, avoid heavy foods and eat it 1.5 hours before exercising.

6. Omega-3 Fatty Acids:

If possible, please try fish instead of your normal protein source. (Thrice a week) We recommend small fishes like Salmon, Sardines, Mackerel. This reduces the chances of heavy metal toxicity, while having adequate amounts of Omega-3. We are avoiding fish oil supplements as there is a quality control problem with fish oil right now.
